

SCHEMATIC DIAGRAM FOR MC-01GA CHASSIS

Value of resistor, capacitor and inductor	Observation of voltages and waveforms
--	--

- 1. Resistances are shown in ohms, K=1,000, M=1,000,000.
- 2. Unless otherwise noted in schematic, all capacitor values less than 10 are expressed in pF and the values more than 10 in μ F.
- 3. Unless otherwise noted in schematic, all inductor values more than 1 are expressed in μ H and the values less than 1 in mH (or 1 in μ H).
- 4. Voltages read with VTVM from point to chassis ground.
- 5. Time voltage is 50Hz/500V voltage divider section is colourless.
- 6. The schematic shown is representative only.
- 7. Some components are taken using a wide band oscilloscope and a low capacity probe.
- 8. Check FINE TUNING AND COMPART. RESISTANCE AND COILS controls repeat picture, make sure that COILS and RESISTANCE are in wide-open position in TMS.
- 9. Waveforms are taken using a standard colour signal.
